

Salesforce Solution Architect (M/F)

Location: Turin

Main purpose of job

In an innovative and continuously evolving context such as **Eutelsat**, we are looking for a **Salesforce Developer** to be included in the software development team.

We are a unique company in Turin: **Skylogic is 100% Eutelsat**, a **Multinational Service Provider** and **leading satellite operator** in Europe, the Middle East and Africa.

We provide satellite communication for 40 years for video, data and broadband applications.

For further information, please visit our website www.eutelsat.com

As a **Salesforce Architect**, you will be responsible for owning and delivering complex cloud-based solutions using technologies such as SFDC. The scope is an **IT platform** that provides Eutelsat and its partners (wholesalers and retailers) to **sell and manage satellite Internet connectivity** services in Europe and Africa. The IT platform is mainly installed on **Salesforce** (Sales, Services, Marketing, Pardot, Community), **Zuora** (invoicing, payment), **SAP S / 4HANA** (logistics, finance) and integrated with the baseband systems through an OSS developed by Eutelsat (developed mainly in Java).

Responsibilities:

- Responsible for **designing**, coding, developing, **integrating** and **implementing** of solutions on Salesforce platform
- Responsible for new development along with providing **oversight/Architectural review** for existing developed functionalities by developers
- End to end implementation experience with the salesforce platform
- Ability to lead design sessions and communicate design options
- Working closely with Dev Managers, Functional Analysts and Developers to architect technology solutions to meet company and clients needs.
- Design and develop **integrations** between Salesforce, and other applications/systems. Integration using both Web based technologies (Soap, Rest) and Integration/Middleware tools

Requirements:

- Experience as Technical Architect in Salesforce implementations
- Knowledge of and experience with Service Cloud implementations
- Knowledge of tools and techniques for development through **Apex**, **Visualforce** and related technologies
- Nice to have Salesforce certification
- Nice to have at least one programming language. Object-oriented something such as Java and C # or others.
- Knowledge of and experience with Service Cloud implementations
- Good knowledge of English
- Knowledge in telecommunications is a significant plus
